the versatile sludge application system

We realize you have certain variables that must be considered when planning for on-land application of waste treatment sludge. That's why Ag-Chem systems offer a choice of two job-matched power chassis with 4-wheel-drive flotation and three sizes (up to 3800 gals.) of pressure/vacuum tanks for liquid waste disposal. Four subsurface injector knives bury liquids to 10" depth. System options include transport tankers and nurse trucks, holding tanks, and complete field service. For a color brochure write Ag-Chem Equipment Company, 4900 Viking Drive, Minneapolis, MN 55435 or call (612) 835-2476.
